Ideal For Use In Commercial Spaces:

- ✓ Hospitals
- ✓ Care Homes
- ✓ Doctors Surgeries
- ✓ Dentist Surgeries
- ✓ Classrooms
- ✓ Childcare Centres
- ✓ Offices
- ✓ Commercial Kitchens

Benefits

- Continuous air purification
- Balances temperatures, improves comfort, reduces heating & cooling costs & reducing carbon emissions
- Breathing fresh air protects your health
- Active technology reduces viruses, bacteria, mould spores and odours right at the source to give you the freshest air possible
- Increased productivity
- Creates a fresh, healthy feeling indoor environment
- Neutralises viruses, germs and bacteria and significantly reduces the risk of spreading pathogens in the air
- Reduced absenteeism in workplaces and schools
- Ensures your environment is clean and healthy 24/7

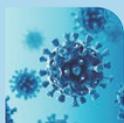

Saves You Money and Your Health

Since most people spend over 90% of their time indoors, it's important to consider the impact these pollutants can have on long-term health. The PureAir PHI air purification and infection control system significantly improves indoor air quality (IAQ) reducing viruses, bacteria, gases, VOCs (Volatile Organic Compounds), mould and odours by up to 99%+ using an integrated PHI Purification Cell, whilst its advanced atmosphere oxidation technology gives indoor environments fresh, clean and odour free air.

This makes it the perfect low cost solution for hospitals, care homes, doctors & dentist surgeries, children's nurseries and food preparation facilities etc. in maintaining a clean, healthy and odour free environment.

Protection From:

Viruses

Bacteria

Mould Spores

Dust

Pollen

Dander

VOC's

Why Use RGF's PHI-CELL® Technology?

The PureAir PHI Series is an air purification and airflow circulation fan system, incorporating the latest in PHI (Photohydroionisation) Cell technology from RGF Environmental, one of the world's leading specialists in air, water and food purification, to efficiently and effectively neutralise up to 99% of all harmful germs, bacteria, viruses, mould and other contaminants in any internal environment.

The PHI Cell emits 'Ionised Hydroperoxides', a naturally occurring cleaning agent, which are circulated throughout spaces via the fan. As the fans continue to circulate internal atmosphere, the PHI circulates its neutralising Ionised Hydroperoxides, providing 24/7 continuous Air Purification.

Specifications

Product Weight: 4.1kg | Electrical: 230 VAC | Warranty: 2 years replacement on PHI Cell. 5 years replacement on fan unit.
